### Ward's Garden Centre Turnkey Operation

Established in 1963 Ward's Garden Centre has developed in to one of the largest and best stocked garden centres in the Derbyshire area. This independent, family owned and run business is focused on quality, value and service with the emphasis on being more than just a Garden Centre!

The catering facilities at the Centre are an important part of their service offering in order to complete the customer experience. Vision were tasked with the complete design, installation and project management of the kitchen and restaurant facilities in the centres 150 seat, Old Potting Shed Coffee Shop and Restaurant.

It was essential that the coffee shop and restaurant facilities were able to provide hot daily lunches, serve an extensive hot and cold menu as well as cater for parties of up to 60 people.

Working directly with the centres management team and Head Chef, Vision provided a complete turnkey operation from building work, electrical, decoration, furniture and equipment to deliver the impressive new restaurant and coffee shop facilities at the Centre.

### Seasons Garden Centre

Local, family run garden centre, Seasons have been providing garden centre services for over seventy years. Based in Bedford, Seasons Garden Centre offers the full Garden Centre experience. Seasons recognised the added value they could bring to the centre with new and improved coffee shop facilities.

Working closely with the management team, Vision recommended they relocate the existing coffee shop to a new area within the centre. Tasked with this, Vision were responsible for the complete transformation of the coffee shop and kitchen area from design to installation, including the sourcing and provision of equipment.

The project not only involved relocation and redesign but also the design and installation of three new servery counters. Feedback from both staff and customers at the centre has been exceptional and Vision are delighted with the transformation.

These projects come at a time when Vision have completed a variety of Garden Centre projects across the UK, including Gordale Garden Centre, Barton Grange, Ashton Park, Langlands, Fryer Rose and Rushton's Nurseries, to name a few.
